EDITORIAL

Terry Goodman

We want to welcome you to the first issue of our third year with the **Missouri Journal of Mathematical Sciences**. If you are already a subscriber, we thank you for your support of **MJMS**. We encourage you to share the journal with your colleagues. If you are not a subscriber, we hope that you will find **MJMS** to be interesting and relevant for you and that you will consider taking out a subscription soon.

If you are familiar with **MJMS**, you will notice that we have made a change in the format of the journal. We believe that this larger size will make the journal easier to read and more convenient to handle. We welcome your comments about the new format or any other aspect of **MJMS**.

Let me encourage you to consider several ways that you might become more involved with **MJMS**. We welcome manuscripts submitted for publication. We have been most impressed with the quality of the manuscripts already submitted and you will find the articles in this issue to be representative of that quality.

You may have one or more problems that you could submit for the problems section or you may have solutions for problems that have already appeared in **MJMS**. Finally, please send us announcements of professional meetings, seminars, etc.

We look forward to another exciting year for **MJMS**, and we hope that you will continue to find it interesting, challenging, and informative.
