Title Index

A–Sets and Abcohesive Spaces, David John, Vol. 5, 63.

Accelerated MSOR Method, Saadat Moussavi, Vol. 5, 24.

Almost Locally Connected (SO) Spaces, Shing–Seung So, Vol. 0, No. 1, 7.

An Analytical Approach to a Trigonometric Integral, Joseph Wiener, Vol. 2, 75.

The Analytical Machinery of Symmetry, Bella Wiener and Joseph Wiener, Vol. 3, 130.

An Application of the Unique Continuation Property to the Computation of a Fourier Transform, Joseph Bennish, Vol. 4, 107.

Another Proof That the Closed Unit Interval is a Continuous Image of the Cantor Set, David Beach and Bobby Winters, Vol. 5, 109.

Application of Translation of Sets, Kandasamy Muthuvel, Vol. 3, 139.

On the Area Inside a Circle, Steven G. Krantz, Vol. 4, 2.

Beginning Algebra: Arithmetic in Disguise, William Livingston, Vol. 1, No. 1, 22.

Breaking the "Zip Code" Code, Betty Travis, Vol. 1, No. 2, 2.

Calculating An Invariant Subspace of Diagonally Dominant Matrices – Part I, Noah H. Rhee, Vol. 5, 71.

Calculating An Invariant Subspace of Diagonally Dominant Matrices – Part II, Noah H. Rhee, Vol. 5, 116.

A Challenging Area Problem Revisited, Robert L. Doucette, Vol. 5, 59.

On the Common Zeroes of Finite Blaschke Products, Ramesh Garimella, Vol. 2, 70.

Computer Science is Alive and Well on Planet Earth, F. Garnett Walters, Vol. 1, No. 2, 23.

Consecutive Composite Values of a Quadratic Polynomial, Don Redmond, Vol. 3, 25.

Convergence Semigroups, Shing–Seung So, Vol. 1, No. 3, 11.

A Counter Example in Group Theory, Ramesh Garimella, Vol. 3, 77.

Decomposition of the Line into Countably–Many Measure–Theoretic Dense Sets, Joseph Bennish, Vol. 5, 123.

On Defining A Hyperbola, Mangho Ahuja, Vol. 1, No. 3, 23.

Did You Do Anything in Class Today?, Richard L. Francis, Vol. 5, 21.

Differentiating Indefinite Integrals with Respect to a Parameter, Joseph Wiener and Donald P. Skow, Vol. 3, 65.

Discriminant Analysis Using A Bicriteria Linear Program, Yi–Hsin Liu and John Maloney, Vol. 4, 62.

Elementary Applications of Complex Numbers, Russell Euler, Vol. 4, 70.

Evaluation of a Family of Improper Integrals, Russell Euler, Vol. 0, No. 1, 3.

Evaluation of a Family of Summations, Russell Euler, Vol. 5, 17.

An Example of a Function in $\mathrm{Lip}_{\frac{1}{2}}([0,2\pi])$ With An Absolutely Non–Convergent Fourier Series, Jayanthi Ganapathy, Vol. 5, 126.

Expansions of Baire Spaces, James Foran and Paul Liebnitz, Vol. 1, No. 3, 2.

Extensions of Topologies, T. L. Hicks, Vol. 2, 62.

Fibonacci Decimal Number Patterns Via the Generating Function, Russell Eu-

ler, Vol. 2, 137.

A Generalization of Young's Theorem, Saadat Moussavi, Vol. 4, 76.

A Generalized Exponential Function, Russell Euler, Vol. 5, 68.

The Generating Function for the Fibonacci Sequence, Mohammad K. Azarian, Vol. 2, 78.

Generating Functions: Applications and Techniques, Philip M. Tsang, and Shing S. So, Vol. 4, 109.

A Geometric Approach to a Trigonometric Integral, Russell Euler, Vol. 1, No. 1, 28.

Homotopy Extension Theorem for a Fiber–Preserving Piecewise Linear μ–Homotopy, Tran van Thuong, Vol 3, 33.

How Mathematics Grows, Tran van Thuong and Barry E. Brown, Vol. 1, No. 3, 28.

I Can't See the Math for the Problems, Richard L. Francis, Vol. 3, 142.

Inner Plethysm in the Representation Ring of the General Linear Group, Essam A. Abotteen, Vol. 2, 115.

Integrating Powers of Trigonometric Functions, Joseph Wiener, Donald Skow, and Will Watkins, Vol. 4, 55.

On the Intersection of the Sets of Base b Smith Numbers and Niven Numbers, Wayne L. McDaniel, Vol. 2, 132.

Long–Ago Problems for the Student of Today, Richard L. Francis, Vol. 2, 51.

A Note on Lower Near Frattini Subgroups, Kandasamy Muthuvel, Vol. 4, 11.

On the Lower Near Frattini Subgroups and Nearly Splitting Groups, Mohammad K. Azarian, Vol. 2, 18.

On the Lower Near Frattini Subgroups of Amalgamated Free Products of Groups I, Mohammad K. Azarian, Vol. 2, 105.

Mathematics Placement and Assessment at Central Missouri State University, Edward Davenport and Marte Carter, Vol. 4, 121.

A Matrix Method for Solving the Postage Stamps Problem, Wen–Seng Chou, Harold Bowman, and Jan–Shyong Shiue, Vol. 3, 70.

Maximizing the Surface Area of N–Dimensional Unit Sphere, Russell Euler, Vol. 4, 14.

A Model For Memory Interference in Multiprocessors, Stanley Rabinowitz, Vol 3, 12.

Model Geometry For HIV–1 and –2, H. Westcott Vayo, Vol. 4, 49.

Noetherian Integrally Closed Duo Rings are Krull Rings, Elbert Pirtle, Vol. 1, No. 1, 9.

A Note on a Counter Example in Finite Groups, Kandasamy Muthuvel, Vol. 5, 16.

A Note on a Differential Equation, Russell Euler, Vol. 1, No. 1, 26.

Note on the First Fundamental Theorem for Riemann–Stieljtes Integrals, Robert Cacioppo, Vol. 4, 9.

A Nowhere Analytic C^∞ Function, Kent G. Merryfield, Vol. 4, 132.

One–to–One Continuous Extensions of Analytic Functions, Ramesh Garimella, Vol. 2, 12.

A Quadratic Programming Approach for Solving Discriminant Analysis Problems, John Maloney and Yi–Hsin Liu, Vol. 4, 139.

Primes, Semi–Primes, and Strong Composites, Richard L. Francis, Vol. 2, 4.

A Puzzle in Kelley's Appendix, William Livingston, Vol. 2, 26.

On the Reflection Properties of the Conic Sections, Joseph Bennish, Vol. 5, 56.

A Relationship Between the Metropolis Algorithm and the Two–Membered Evolution Strategy, L. Vincent Edmondson, Vol. 5, 8.

Resonance in Linear Differential Equations and L'Hospital's Rule, Joseph Wiener, Vol. 2, 96.

On the Right–Hand Derivative of Integral Functions With a Discontinuous Integrand, Joseph Bennish, Vol. 5, 4.

Sequences, Mathematical Induction, and the Heine–Borel Theorem, Shing–Seung So, Vol. 3, 84.

Shannon's Theorem and the Binomial Random Variable, Martin Erickson, Vol 5, 2.

A Simple Proof of Cauchy's Integral Formula for Circles, Larry Eifler, Vol. 1, No. 2, 18.

Some Applications of the Stone–Weierstrass Theorem, Tran van Thuong, Vol. 3, 79.

Some Highlights from ICME–6, Sherralyn Craven, Vol. 0, No. 1, 25.

Some Properties Related to Dendritic Spaces, David John, Vol. 4, 116.

Some Thoughts on the Absolute Convergence of a Trigonometric Series, Jayanthi Ganapathy, Vol 3, 2.

Stirling's Formula: An Application of the Central Limit Theorem, K. L. D. Gunawardena, Vol. 5, 107.

A Storming of our Pythagorean Aristocracy, Stan Hartzler, Vol. 0, No. 1, 18.

On the Structure of the Hopf Representation Ring of the Symmetry Groups, Essam Abotteen, Vol. 4, 17.

On the t–Extendability of the Generalized Petersen Graphs, Gerald Schrag and Larry Cammack, Vol. 1, No. 1, 3.

Teaching About Professionalism and Ethics in a Computer Science Course, L. Vincent Edmondson, Vol. 3, 61.

There May be More Than One Way to Find the Derivative of a Function, Mohammad K. Azarian, Vol. 5, 13.

A Trigonometric Derivation of Point–To–Line and Point–To–Plane Distance Formulas, Bella Wiener and Joseph Wiener, Vol. 5, 113.

Triangles with Equivalent Relations Between the Angles and Between the Sides, Mogens E. Larsen and David Singmaster, Vol. 3, 111.

On Unit Groups of Extension Rings: An Example, K. Alan Loper, Vol. 3, 20.

Using a Nonlinear Discriminant Function for Solving Discriminant Analysis Problems, John Maloney and Yi–Hsin Liu, Vol. 5, 83.

The Volume of an n–Simplex With Many Equal Edges, Stanley Rabinowitz, Vol. 1, No. 2, 11.

A–Sets and Abcohesive Spaces, David John, Vol. 5, 63.

Accelerated MSOR Method, Saadat Moussavi, Vol. 5, 24.

Almost Locally Connected (SO) Spaces, Shing–Seung So, Vol. 0, No. 1, 7.

An Analytical Approach to a Trigonometric Integral, Joseph Wiener, Vol. 2, 75.

The Analytical Machinery of Symmetry, Bella Wiener and Joseph Wiener, Vol. 3, 130.

An Application of the Unique Continuation Property to the Computation of a Fourier Transform, Joseph Bennish, Vol. 4, 107.
